Dear [Legislator's Name],

I hope this message finds you well. I wanted to share an exciting opportunity to learn more about an innovative and proven model for enhancing local economic resilience: **sovereign state banks**.

On February 13, Professor Richard A. Werner (one of the world's leading experts in banking and finance) and Catherine Austin Fitts (president of Solari, Inc., publisher of the Solari Report, and managing member of Solari Investment Screens) will be hosting an online briefing to discuss the benefits of sovereign state banks and how they can strengthen state economies, support community banks and small businesses, and enhance state sovereignty.

**Details of the event:**

- **Topic:** Sovereign State Banks
- **Date:** Thursday, February 13, 2025
- **Time:** 12:00-2:00 pm ET
- **Location:** Zoom

In this briefing, Professor Werner will share insights from his work, including lessons from the highly successful Bank of North Dakota (BND), the nation's only state-owned bank. The session will cover key aspects of state banks, including:

- How they support community banks and credit unions, the backbone of local economies
- Their governance, auditing, and risk management structures
- The benefits of keeping bank profits within the state
- The potential role of bullion depositories

A recent interview by Professor Werner on this topic is publicly available here:

As a constituent, I believe that a sovereign state bank could have a significant positive impact on [State]. The February briefing is an excellent opportunity to explore actionable steps toward financial independence and local economic development for our state, and I encourage you to attend. If you or a member of your team are interested, you can RSVP or request more information by contacting Elizabeth Murphy at ElizabethMurphyTN@protonmail.com.

Thank you for your dedication to our state's future. I hope you'll take advantage of this informative session. I'd be happy to follow up if you'd like more details or have any questions.

Warm regards,
