Subject: Fw: Dr Mike Yeadon: Introductory statement about serious crimes per Mark Sexton communication

To: Ben.Bates@met.police.uk <Ben.Bates@met.police.uk> Cc:

Mark Sexton

Dear Ben Bates,

I have been asked by former policeman, Mark Sexton (copied) to introduce myself to you & to indicate the fields in which I have unequivocal evidence of criminal activity.

Let me begin my outlining my credentials to have realised that the areas I will outline were incorrect in the first place.

My name is Dr Mike Yeadon. I am the most senior, former “big pharma” & biotech research executive speaking out about several serious crimes in relation to what I call the “Covid era”.

My original training was in Biochemistry & Toxicology, in which I was awarded the strongest first class joint honours degree that the School of Biomedical Sciences had ever awarded at the time (1U85, University of Surrey).

Part of my undergraduate training involved research placements at the Chemical Defence Establishment, Porton Down, Wiltshire, where I was a small cog in the long term development of injected antidotes for nerve gas poisoning to protect British troops. I also worked at the then Central Laboratory of the Forensic Sciences Service, Aldermaston, Berkshire, adjacent to the Atomic Weapons Research Establishment. While with the Forensic Science Service, I received training on several precision analytical methods including mass spectrometry, then a highly technically complex method.

As far as I recall, I had security clearance for both establishments. Porton Down, then as now, is a top security facility with an international reputation.

My PhD, in the field of Pharmacology was “On the effect of opiates on respiratory function” (1U88) and this was sponsored by the MOD.

After securing my PhD, which gave me a sound training in several additional subdisciplines of biology, chemistry & drug metabolism, I joined the pharmaceutical industry.

I spent 24years with “big pharma”, starting at Wellcome Research Laboratories, where I briefly worked alongside a Dr Patrick Vallance (who became Chief Scientific Advisor to the British Government).

For the longest period, I was in charge of Pfizer’s global research in the field of Allergic & Respiratory Disease Therapeutics. I left Pfizer in 2011, having reached the level of Vice President, because the

company had decided to exit their large R&D base in Kent. The parting was cordial. Before leaving, I sought to find new homes for the portfolio of exploratory medicines I had helped create & was gratified that Mylan U.K. Ltd, the world's second largest generics company, acquired much of my former portfolio soon after I had left.

I later founded & lead as CEO a highly successful biotechnology company, Ziarco Pharma Ltd. Pfizer and four other venture capital firms were investors in my company, which was acquired by Novartis Pharmaceuticals, in 2017.

My accomplishments are considered by some to have been unusual. So much so that a former Pfizer board member & previously worldwide head of R&D, Dr John LaMattina, wrote up my last venture in Forbes, a leading business magazine (February 2017).

<https://www.forbes.com/sites/johnlamattina/2017/03/15/turning-pfizer-discards-into-novartis-gold-the-story-of-ziarco/>

In summary, I have had a very strong training in multiple disciplines and over 30 years leadership experience in the field of inventing and testing new medicines for respiratory illnesses. I have an excellent analytical background and I can claim to be at least the equal of anyone advising the government in science.

I have no history of “conspiracy theory” or political campaigns or protests. I don’t believe I made a single public comment on anything prior to 2020.

My accomplishments in applied biomedical sciences qualify me to be taken seriously. I ask that the evidence I marshal is evaluated thoroughly. I am confident in my assessments, which have been tested by dozens of others, internationally well known scientists and doctors.

I have filed numerous legal statements as affidavits used in court proceedings in several countries.

I’m going to introduce just two topics at this point. To cover everything would be simply too overwhelming to read, let alone absorb & understand at a single sitting. I’m simply going to make statements. I’m not going to attempt to prove them in this short communication. Rest assured I have done so however, on dozens of occasions. I’ve given upwards of 250 full length interviews.

I must warn the reader that even this deliberately limited information is going to be shocking, if you hadn’t already realised that something without precedent in the world was going on. Please also note that ordinary searching on the internet, often colloquially as “googling”, is not going to find many of the sources upon which I have drawn. The major search engines have been manipulated such that the results exclude material troubling to the authorities.

The two areas are:

1. The claimed pandemic.
2. The injections, purporting to be vaccines.

The main claims are stark.

1. Put simply, there has been no pandemic. There was the normal range of illnesses in the early part of 2020 as in any other year. What was different about 2020 was that all governments, lead by the WHO, engaged in coordinated lying to their citizens. This continues to this day. Everyone was told there was a pandemic coming. The illusion was created by deliberate misuse of a clinical diagnostic test called PCR. The heart of this entire deception is the incorrect belief that PCR is nearly flawless and so a positive result means that a person “had covid”. There is no such disease. Not one symptom is unique to the claimed new disease. A positive test was called “a case”. Anybody dying within a few weeks of a positive test was declared “a covid death”. All that was needed was to roll out such tests rapidly in early 2020 & the carefully planned result, an apparent “pandemic” was created. Government & media lies was initially all it took to maintain the illusion.

Crucially, the epidemiological evidence shows that there was no additional illness or deaths compared with the same period in any other year. Numerous scientific papers and authors will present their evidence on this point, including university professors qualified in epidemiology.

The WHO played their part in the crime, by declaring a “public health emergency of international concern”, a PHEIC, or a “pandemic”. Immediately after WHO’s fraudulent declaration, changes in medical procedures were imposed everywhere. These changes caused the deaths that were held up to the citizens as proof that we were in a pandemic. We have a long list of witnesses to these changes being inappropriate and often fatal. Notice my PhD was on the effects of opiates, like morphine, on respiration. I knew that what was being prescribed was definitely inappropriate.

So, no pandemic. Only the deliberate illusion of one. This was accompanied by changes in medical practise that would predictably result in large numbers of deaths in hospitals, care homes and the community. No one will fail to appreciate the severity of the charges here.

I cannot be sure the motivation for this deception was. But the effects of it has been to severely damage the economies of scores of countries, with financial transfers counted in trillions of pounds, from the poorest & the taxpayers to the wealthiest elites. Civil society has also been severely disrupted and has never been allowed to begin to heal.

Other, less speculative motivations became apparent as 2020 wore on & this brings us to my second, shocking charge.

2. The materials that are being called “Covid19 vaccines” are obviously not vaccines. Note, there has been no pandemic.

My entire career has been in the field of designing and testing new arrangements of atoms to create what we hope will be new potential medicines. In addition to bringing about desired changes in the body, the

main concern is to avoid unwanted effects, in other words, toxicity or harms.

My training in mechanistic toxicology was repeatedly useful in helping teams foresee, avoid or understand such problems.

So I understand deeply how to design molecules and also how to interrogate them for their prospects to bring about desired effects and crucially to discern risks of harms. I don't think it's too great a claim to say that there isn't anyone better qualified than I am to do this in relation to these novel treatments.

I'm going to go directly to the charges.

These injections have been carefully designed to intentionally cause toxicity in those injected with them.

I can detect at least three, separate features of these injections which would be expected to injure, to kill or to reduce fertility in survivors. These are not mistakes. Each are so obviously deliberate to anyone who has a history of involvement in rational drug design for new medicines.

At least two features are common to every injection purporting to be a "covid vaccine". First, the mRNA nature of the major products. Second, the lipid nanoparticle nature of the formulations in which they are encapsulated.

The mRNA is genetic code for a chosen protein. Regardless of what the protein is, once the human body is caused to express it, it will be recognized as foreign and attacked by their own immune system. Depending on details we cannot know, just by looking at the glass vials, some people will be injured as a result of this lethal autoimmune attack. Others will be killed, the time taken to die & their suffering before they die will vary. It'll look like the normal range of illnesses. There will simply be more of them.

Because of the lipid nano particle formulation, some of the injected materials will accumulate in the ovaries (possibly also the testicles). This homing property in reproductive tissue has been known about for more than a decade. The effect will be a lowering of fertility affecting every stage of reproduction.

I can bring detailed rationales for each of these claims as well as several others.

I also have an unusual piece of evidence, given the crimes I claim have been committed. I had worked out part of this assault before any purported vaccine had received its fraudulent authorization.

Having done so, with another author, I wrote an open letter to the European Medicines Authority in early December 2020, which is attached below. In it, we warn of the harms which we anticipated. It has been more than upsetting to watch them come true, the last taking a year, the adverse effects on fertility.

All-causes mortality is elevated almost everywhere in the world that these products have been widely used and live births sharply reduced.

I look forward to the opportunity to speak with you in considerable detail about these and other charges.

I will publish this letter on my Telegram site, where 20,000 followers will no doubt be interested to learn what the Met Police does with this information. If I may be so bold, I would invite you to think about how you plan to describe your next actions to your family and, if you have them, your children and grandchildren.

With best wishes and thank you for your attention.

Dr Mike Yeadon
